Professional Summary

I'm a full-stack developer focused on building AI-powered systems, workflow automation tools, and data-driven web applications. Interested in the intersection of technology, business, and real-world impact. Looking to bring a sharp attention to detail, critical thinking, and a collaborative approach to working across technical and non-technical teams.

Education

Santa Clara University | Santa Clara, CA

Sep 2023 - Jun 2027

Bachelor of Science in Commerce: Management Information Systems

Minor: Computer Science

- Relevant Coursework: Database Management Systems, Systems Analysis & Design, Advanced Theory of Algorithms, Data Structures & Algorithms

Work Experience

Web Developer | [Front Door Communities](#) | San Jose, CA

April 2026 - Present

- Prototyped a multi-page responsive website to streamline user navigation.
- Architecting a custom CMS integration to help non-technical staff to independently manage the site.
- Managing the full development lifecycle from requirement gathering to full-stack implementation.

Software Developer Intern | [Pacxa](#) | Honolulu, HI

Jun 2025 - Sep 2025

- Designed a mismatch reporting system to validate customer and product data, reducing manual reconciliation time by 50%.
- Developed a Next.js web app with search and filtering for efficient data validation.
- Integrated Azure OpenAI for entity resolution to normalize inconsistent customer name entries.
- Refactored a Power Apps talent management tool into a Next.js web app with AI-powered semantic skill matching for HR and managers.

Front Desk/Technician | [Mac Made Easy](#) | Kailua, HI

Jul 2024 - Sep 2024

- Independently managed front desk operations including client diagnostics, service intake, customer calls, and repair coordination.
- Contributed to doubling monthly revenue through strong customer service and upselling.
- Refurbished over 50 defective MacBooks and prepared them for resale.

Skills

Programming: Python, C++, JavaScript, TypeScript, SQL

Software: Next.js, Node.js, Chakra UI, React, MongoDB, Azure OpenAI, Git, EmailJS, Microsoft Power Apps

Other: Hardware installation & repair, Agile/Scrum workflows

Leadership Experience

Community Service Volunteer | San Jose, CA

Sep 2025 - Dec 2025

- Volunteered weekly to prepare and distribute meals to 60–70 individuals experiencing homelessness in downtown San Jose.
- Coordinated with team members to ensure organized meal service across weekly distributions.
